

INDUSTRIAL ADHESIVE

PI-1000

PRODUCT DESCRIPTION: EVA base adhesive with fast drying and high adhesion to various bond and couches paper substrates and other coatings. Dry transparent. To adhere folding carton for roller application.

BASIC USES: Excellent adhesive for folding boxes on both porous and non-porous surfaces, using a roller.

ADVANTAGE:

1. Fast drying speed.
2. Safe for use.
3. High molecular weight.
4. High adhesion strength.
5. Water resistant.
6. Superior stability of viscosity.
7. Good machining.
8. Not flammable.
9. Resistant to different microorganisms and bacteria.
10. Flexible product.

TECHNICAL INFORMATION

Solids by weight: 58 +- 1%

Adhesive type: EVA copolymer.

Weight per gallon: 905 +- 0.05 lbs.

Diluent agent: Water.

Flash point: Not flammable.

Color: wet (white) and dry (transparent).

Reaction to borax: Coagulation
20rpm

Viscosity: 3900 ± 100 cps Brookfield Spindle # 4,
