

# INDUSTRIAL ADHESIVE

## PI-2950

**PRODUCT DESCRIPTION:** EVA base adhesive with fast drying and high adhesion to various bond and couches paper substrates and other coatings. Dry transparent.

**BASIC USES:** Excellent adhesive for folding boxes on both porous and non-porous surfaces, using roller applicators. It is also used as an adhesive to label polyethylene containers.

### ADVANTAGE:

- Fast drying speed.
- Safe for use.
- High molecular weight.
- High adhesion strength.
- Waterproof.
- Superior stability of viscosity.
- Good machining.
- Not flammable.
- Resistant to different microorganisms and bacteria.

### TECHNICAL INFORMATION

Solids by weight: 58 + - 1%

Adhesive type: Copolymer of EVA.

Weight per gallon: 8.94 + - 0.05 lbs.

Diluent agent: Water.

Flash point: Not flammable.

Color: wet (white) and dry (transparent).

Reaction to borax: Coagulation.  
20rpm

Viscosity: 2200-2300 cps Brookfield Spindle # 4,
