

INDUSTRIAL ADHESIVE

PI-3250

PRODUCT DESCRIPTION: Adhesive pressure sensitive base EVA fast drying and high adhesion to various substrates of bond and couches paper and other coatings. Dry transparent.

BASIC USES: Excellent adhesive for bonding porous surfaces as non-porous, using roller applicators. It is also used as an adhesive to label polyethylene containers.

ADVANTAGE:

1. Fast drying speed.
2. Safe for use.
3. High molecular weight.
4. High adhesion strength.
5. Water resistant.
6. Superior stability of viscosity.
7. Good machining.
8. Not flammable.
9. Resistant to different microorganisms and bacteria.

TECHNICAL INFORMATION

Solids by weight: 55 + - 1%

Adhesive type: Copolymer of EVA.

Weight per gallon: 8.90 + - 0.05 lbs.

Diluent agent: Water.

Flash point: Not flammable.

Color: wet (white) and dry (transparent).

Reaction to borax: Coagulation.

Viscosity: 1900-2100 cps Brookfield Spindle # 4, 20rpm
