

Wood Zin™ PR-502

Water Repellent Wood Preservative

Description:

Wood Zin™ It is a preservative and water repellent, ready to use, 100% transparent and paintable. Formulated with zinc naphthenate, it provides long-lasting protection even against termites. It can be used in interior and exterior woods, since it also prevents rotting.

Meets Requirements for:

MPI:	N/A
Green Performance 1:	N/A
Green Performance 2:	N/A
VOC Compliant (<400g/L):	N/A

Product Advantages:

- Penetrates the wood
- Easy to use
- Durable
- Not stain
- Paintable
- Ready to use
- Preserves all types of wood
- Water resistant
- Transparent finish

Uses:

Wood Zin™ is specially formulated to protect and preserve both interior and exterior wood against mold and mildew, which cause stains. Excellent for exposed wood surfaces as a protective coating.

Technical Data:

Product Type:	Solvent
Finish:	Yellowish
Solids (%):	9 ± 2% by weight 13 ± 2% by volume
Weight/Gallon:	6.7 ± 0.05 lbs. (0.804 ± 0.02 g.cm)
Sizes:	1 gallon 1 quart
Thinning:	Do not dilute. If is necessary, use Mineral Spirits <10%.
Flash Point:	106 °F TOC
Viscosity:	40 - 50 cps

Notice: The technical data contained herein are true and accurate to the best of our knowledge. Published technical data and instructions are subject to change without prior notice.

S.D.S.: Available upon request.

Surface Preparation:

All surfaces must be dry, clean, sound and free of contaminants. Remove all dirt, grease, mildew, oil, dust, and other soluble contaminants.

Method of Application:

Mixing: This is a one component product. Always hand mix thoroughly with a paddle before application.

Apply by air pressure pump, brush, roller or airless spray. Roller application may require special care to prevent bubbling and more than one application to assure proper penetration to the wood.

Individual protection measures

As a preventative measure it is recommended to use basic Personal Protection Equipment see section 8 (eight) of the S.D.S. For more information on Personal Protection Equipment (storage, use, cleaning, maintenance, class of protection) consult the information leaflet provided. For more information see subsection 7.1 of th S.D.S. All chemical protective clothing use must be based on a hazard assessment to determine the risks for exposure to chemicals and other hazards. Conduct hazard assessments in accordance with 29 CFR 1910.132.
