FOR PROFESSIONAL USE ONLY

CA-150™ 17% SOLIDS
A professional solvent-based, super fast drying spray grade contact adhesive, made of polychloroprene rubber and phenolic resins dissolved in solvents. Lanco CA-150™ is specially designed to be easily applied by brush or spray and dries in 10 minutes. Bonds on contact and has good initial strength that increases with time. Needs no clamping. Resists water, heat, oil, grease and most household chemicals.

**Advantages:**
- Ultra fast drying
- Instant bond
- Permanent bond
- Aggressive initial strength
- Heat, water, oil & household chemicals resistant

**Coverage:** 135 sq. ft. / gal. Covers with a minimum of 2.0 dry grams / sq. ft. on each surface. Very porous materials (plywood) require two coats.

**Color:** Natural / Clear

**Weight / Gallon:** 5.63 ± 0.05 lbs.

**V.O.C. Content:** 5.55 lbs / gal.

**Viscosity:** 225 - 250 cps

**Flash point:** > 20°F TCC (SETA Flash)

**Shipment Information:**
- Bag: Domestic ground
- Adhesive, containing a flammable liquid, hazardous class 3, UN11133, packaging group I, flash point > 207, boiling point 133-5792.
- Schedule commodity #3066.91.0000

**Primary Contents:** Tobacco (cas #108-88-3), Acetone (cas # 67-64-1), N-Hexane (cas # 110-54-3), Toluene (cas #108-88-3), Acetone (cas # 67-64-1), MEK (cas #78-93-3), N-Hexane (cas # 110-54-3)

**FOR PROFESSIONAL USE ONLY

CA-152™ 18% SOLIDS
A premium solvent-based, super fast drying spray grade contact adhesive, made of polychloroprene rubber and phenolic resins dissolved in solvents. Lanco CA-152™ is specially designed to be easily applied by spray and dries in 10 minutes. Bonds on contact and has a high initial strength that increases with time. Needs no clamping. Highly resistant to water, heat, oil, grease and most household chemicals.

**Advantages:**
- Ultra fast drying
- Instant bond
- Permanent bond
- Powerful tack
- Heat, water, oil & household chemicals resistant

**Coverage:** 150 sq. ft. / gal. Covers with a minimum of 2.0 dry grams / sq. ft. on each surface. Very porous materials (plywood) require two coats.

**Color:** Natural / Clear

**Weight / Gallon:** 6.69 ± 0.05 lbs.

**V.O.C. Content:** 6.40 lb / gal.

**Viscosity:** 225 - 300 cps

**Flash point:** > 20°F TCC (SETA Flash)

**Shipment Information:**
- Bag: Domestic ground
- Adhesive, containing a flammable liquid, hazardous class 3, UN11133, packaging group I, flash point > 207, boiling point 133-5792.

CA-372™
17% SOLIDS

A high performance solvent-based contact adhesive made of polychloroprene rubber and phenolic resins dissolved in solvents. Lanco CA-372™ is specially designed to be easily applied by brush or roller and dries in 30 minutes. Bonds on contact and has excellent initial strength that increases with time. CA-372™ doesn’t need clamping. Resists water, heat, oil, grease and most household chemicals.

Uses: To provide a powerful and strong bond between dissimilar materials such as plastic laminates, plastic, plywood, hardwoods, leather and metals on flat surfaces (non post forming). Bonds decorative laminates, countertops, wood, canvas and many other materials.

Advantages:
- Bonds on contact
- Spreads easily
- Heat, water, oil & household chemicals resistant

Coverage: 100 sq.ft. / gal. Covers with a minimum of 3.0 dry grams / sq.ft. on each surface. Very porous materials (plywood) require two coats.

Color: Natural / Clear
Weight / Gallon: 7.40 ± 0.05 lbs.
V.O.C. Content: 6.19 lbs. / gal.
Viscosity: 1,200 - 1,500 cps
Flash point: < 26°F TCC (SEFA Flash)
Shipping Information:
- Ship domestic ground
- Contains a flammable liquid, hazardous class 3, UN1990, packing group II, flammable liquid point 75°F, boiling point 350-570°

A high performance solvent-based contact adhesive made of polychloroprene rubber and phenolic resins dissolved in solvents. Lanco CA-372™ is specially designed to be easily applied by brush or roller and dries in 30 minutes. Bonds on contact and has excellent initial strength that increases with time. CA-372™ doesn’t need clamping. Resists water, heat, oil, grease and most household chemicals.

Uses: To provide a powerful and strong bond between dissimilar materials such as plastic laminates, plastic, plywood, hardwoods, leather and metals on flat surfaces (non post forming). Bonds decorative laminates, countertops, wood, canvas and many other materials.

Advantages:
- Spreads easily
- Heat, water, oil & household chemicals resistant

Coverage: 150 sq.ft. / gal. Covers with a minimum of 3.0 dry grams / sq.ft. on each surface. Very porous materials (plywood) require two coats.

Color: Pict
Weight / Gallon: 7.51 ± 0.05 lbs.
V.O.C. Content: 6.11 lbs. / gal.
Viscosity: 1,000 - 1,100 cps
Flash point: < 26°F TCC (SEFA Flash)
Shipping Information:
- Ship domestic ground
- Contains a flammable liquid, hazardous class 3, UN1990, packing group II, flammable liquid point 75°F, boiling point 350-570°

Primary Contents:
- Toluene [CAS #108-88-3], Heptane [CAS #142-82-5], Ethyl Acetate [CAS #141-82-8]

FOR PROFESSIONAL USE ONLY

CA-302™
22% SOLIDS

A high solids, high performance, solvent-based contact adhesive made of polychloroprene rubber and phenolic resins dissolved in solvents. Lanco CA-302™ is specially designed to be easily applied by brush or roller and dries in 15 minutes. Bonds on contact and has good initial strength that increases with time. CA-302™ doesn’t need clamping. Resists water, heat, oil, grease and most household chemicals.

Uses: To provide a powerful and strong bond between dissimilar materials such as plastic laminates, plastic, plywood, hardwoods, leather and metals on flatworks (non post forming). Bonds decorative laminates, countertops, wood, canvas and many other materials.

Advantages:
- High solids adhesive
- Requires initial pressure
- Bonds on contact
- Spreads easily
- Heat, water, oil & household chemicals resistant
- Resists heat, water, oil, grease and most household chemicals.

Coverage: 165 sq.ft. / gal. Covers with a minimum of 3.0 dry grams / sq.ft. on each surface. Very porous materials (plywood) require two coats.

Color: Natural / Clear
Weight / Gallon: 6.81 ± 0.05 lbs.
V.O.C. Content: 5.56 lbs. / gal.
Viscosity: 890 - 900 cps
Flash point: < 26°F TCC (SEFA Flash)
Shipping Information:
- Ship domestic ground
- Contains a flammable liquid, hazardous class 3, UN1990, packing group II, flammable liquid point 75°F, boiling point 350-570°

Primary Contents:
- Toluene [CAS #108-88-3], Heptane [CAS #142-82-5], Ethyl Acetate [CAS #141-82-8]

HEAVY DIY-ER TO PROFESSIONAL

CA-993™
19% SOLIDS

A high performance solvent-based, contact adhesive made of polychloroprene rubber and phenolic resins dissolved in solvents. Lanco CA-993™ is specially designed to be easily applied by brush or roller and dries in 30 minutes. Bonds on contact and has excellent initial strength that increases with time. CA-993™ doesn’t need clamping. Resists water, heat, oil, grease and most household chemicals.

Uses: To provide a powerful and strong bond between dissimilar materials such as plastic laminates, plastic, plywood, hardwoods, leather and metals on flatworks (non post forming). Bonds decorative laminates, countertops, wood, canvas and many other materials.

Advantages:
- High solids adhesive
- Requires initial pressure
- Bonds on contact
- Spreads easily
- Heat, water, oil & household chemicals resistant
- Resists heat, water, oil, grease and most household chemicals.

Coverage: 150 sq.ft. / gal. Covers with a minimum of 3.0 dry grams / sq.ft. on each surface. Very porous materials (plywood) require two coats.

Color: Pict
Weight / Gallon: 6.28 ± 0.05 lbs.
V.O.C. Content: 5.56 lbs. / gal.
Viscosity: 890 - 900 cps
Flash point: < 26°F TCC (SEFA Flash)
Shipping Information:
- Ship domestic ground
- Contains a flammable liquid, hazardous class 3, UN1990, packing group II, flammable liquid point 75°F, boiling point 350-570°

CA-900™
24% SOLIDS

An ultra high solids, high performance solvent-based contact adhesive made of polychloroprene rubber and phenolic resins dissolved in solvents. Lanco CA-900™ is specially designed to be easily applied by brush or roller and dries in 15 minutes. Bonds on contact and has good initial strength that increases with time. Needs no clamping. Resists water, heat, oil, grease and most household chemicals.

Uses: To provide a ultra powerful and strong bond between dissimilar materials such as plastic laminates, plastic, plywood, hardwoods, leather and metals on flatworks and post forming. Bonds decorative laminates, countertops, wood, canvas and many other materials.

Advantages:
- More coverage than regular cements
- Ultra high solids adhesive
- Requires initial pressure
- Bonds on contact
- Spreads easily
- Heat, water, oil & household chemicals resistant
- Resists heat, water, oil, grease and most household chemicals.

Coverage: 180 sq.ft. / gal. Covers with a minimum of 3.0 dry grams / sq.ft. on each surface. Very porous materials (plywood) require two coats.

Color: Natural / Clear
Weight / Gallon: 7.61 ± 0.05 lbs.
V.O.C. Content: 5.77 lbs. / gal.
Viscosity: 1,200 - 1,100 cps
Flash point: < 26°F TCC (SEFA Flash)
Shipping Information:
- Ship domestic ground
- Contains a flammable liquid, hazardous class 3, UN1990, packing group II, flammable liquid point 75°F, boiling point 350-570°

Primary Contents:
- Toluene [CAS #108-88-3], Heptane [CAS #142-82-5], Ethyl Acetate [CAS #141-82-8]

Since 1978, Lanco® has been manufacturing high performance adhesives that are specially designed for the professional market, adhesives that solve problems, make the job easier, work faster & better, save time & money, and build a reputation for the contractor and manufacturer.
## CONTACT ADHESIVE

### CA-274™ 18% SOLIDS

An ultra strong water-based, non-flammable, contact adhesive made of polychloroprene rubber and phenolic resins in a smooth aqueous dispersion. Lanco CA-274™ is specially designed to be easily applied by spray and brush, and dries in 10 minutes. Bonds on contact and has a high initial strength that increases with time. Needs no clamping. Highly resistant to water, heat, oil, grease and most household chemicals.

### CA-1500™ 53% SOLIDS

A professional solvent-based, superior fast-drying spray grade contact adhesive, made of polychloroprene rubber and phenolic resins dissolved in solvents. Lanco CA-1500™ is specially designed to be easily applied by spray and brush, and dries in 10 minutes. Bonds on contact and has a high initial strength that increases with time. Needs no clamping. Highly resistant to water, heat, oil, grease and most household chemicals.
